

Michaël Perrin

contact@michaelperrin.fr – 06.28.34.23.13.

www.michaelperrin.fr

Web developer focused on providing maintainable web sites and applications. While being mostly focused on the server side development, I'm interested in being involved in the whole project design.

Skills: Symfony, SQL, MongoDB, Elasticsearch, HTML5 / CSS3, JavaScript / React, Git.

French, English, Swedish, and some Spanish.

Freelance developer at FoodChéri

June 2017 – current

Development of new features for FoodChéri's website and its backoffice.

Technical environment: Symfony, Doctrine, MariaDB, HTML5, CSS3, Bootstrap, Git / Github, Docker, PHPUnit.

Lead developer at GreenFlex

Apr. 2012 – Apr. 2017

Complete development of web applications:

- Set up the entire architecture for the GreenFlex B2B application, based on Symfony.
- Development of EcoGuide websites, with extensibility in mind.
- Dealing directly with clients to evaluate their needs and implement them.
- Development of REST APIs.
- Introduction of tools and methods to streamline the development process (e.g. Docker).
- Strong focus on technical debt reduction, code quality and best practices.

Focus on the EcoGuide IT project www.ecoguide-it.com

The EcoGuide IT website helps consumers to choose products according to their environmental impact.

The website, its backoffice (written in React) and a generic rating system for products have been developed on a tight schedule for the COP 21 event in Paris.

Technical environment: Symfony 2 / 3, Doctrine, PostgreSQL, HTML5, CSS3 / Sass, Bootstrap, Git / Gitlab, Docker, Elasticsearch, AngularJS, Capistrano, Behat, PHPUnit, RabbitMQ

Developer at Clever Age

June 2010 – Apr. 2012

Development of web applications for a diverse set of clients with a strong focus on code quality.

Technical environment: Symfony 1.4 / MySQL / Doctrine, Bootstrap, jQuery, web services, Git.

AramisAuto

Lead the development of the German website of AramisAuto.

RATP

Developed the itinerary search website of the main public transit operator in Paris.

Developed a backoffice dealing with payment partners for Facebook games.

Developer at Telergos (Owliance group)

Oct. 2007 – June 2010

Developed web applications for insurance contracts management.

Lead the development of a backoffice for an insurance company to manage clients and contracts, with a focus on the extensibility of the web application.

Worked on the implementation of communication between web applications and the insurance business software.

Technical environment: Zend Framework 1.x, Oracle / SQLite, Java, C, SVN.

Developer at Bilendi

Jan. 2007 – Aug. 2007

Developed new versions of Fotolia and Maximiles websites using Zend Framework.

Technologies: PHP, Zend Framework, PostgreSQL, XHTML, CSS, SVN.

Webmaster at Radio Néo

Jan. 2005 – 2011

Voluntary work at Radio Néo to design and develop the entire website.

Technologies: PHP, Drupal, HTML, CSS.

Education

Free studies at Högskolan Väst (Sweden)

Dec. 2006

Various courses taught in Swedish or English.

Maîtrise Informatique at Université de Versailles Saint-Quentin

June 2006

General topics in Computer Science (e.g. Java, distributed systems, databases).

One semester at the University of Skövde (Sweden).
